SchoolsBuddy

SCHOOLSBUDDY

An innovative web and mobile solution for extra-curricular management and online payments.

Created in 2013, and now part of Faria Education Group, SchoolsBuddy is an innovative cloud based extra-curricular management system used by over 200 schools in more than 35 countries to manage multiple tasks within a single software solution.

SchoolsBuddy offers a single solution for multiple tasks.

Activities Management

SchoolsBuddy helps organise activity programmes from sign up to allocation, communication, and management with an intelligent preference based system.

Online Payments

Working alongside other features, SchoolsBuddy links payments with events and many other school payments including activities, trips, music lessons and more.

Event, Sport & Trip Management

Organise all types of school events including trips and sports fixtures from invitation to online consent, payments, and attendance.

Parent Teacher Conferences

Manage online appointment bookings for parent consultations / parent conferences with a clever system to avoid double bookings.
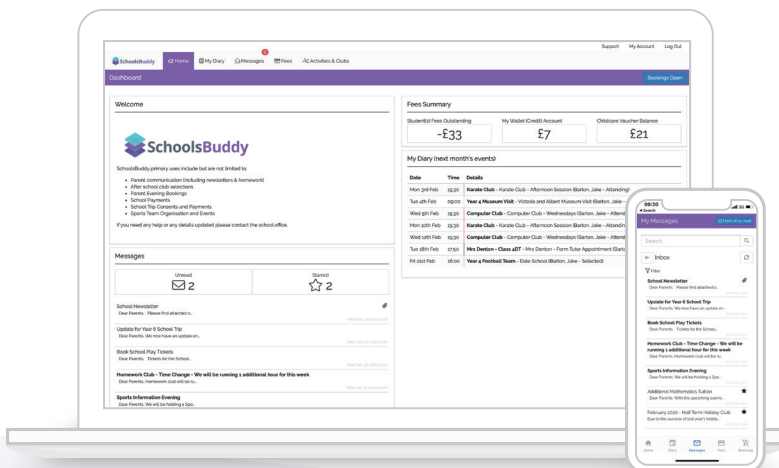

Transport System

Create multiple bus lists for pre-school, after-school, and post activities with in-app mobile attendance registers.

Parent Communications

SchoolsBuddy features built-in parent communications via email and mobile push notifications.

What makes SchoolsBuddy unique?

Integrating directly with your MIS/SIS data, SchoolsBuddy's simple and clear interface for staff, parents, and students, along with full mobile apps, ensures easy uptake and adoption of the system. Schools across the world report increased efficiency for staff, transforming and simplifying admin tasks while saving money by consolidating multiple systems into a single platform.
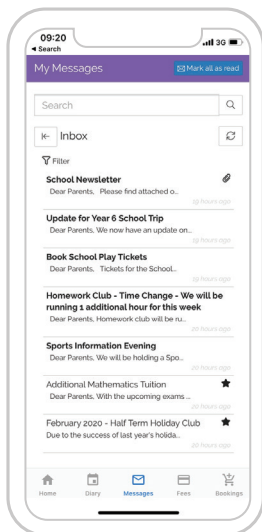

Personal Calendars
At the heart of SchoolsBuddy are user-specific calendars for staff, parents, and students. Each user, via their own login, will be presented with a calendar which shows only events relevant to them or their children (parents of more than one child will see all of their children's events in a single view).

Built-in Reports
Generated by Microsoft Power BI, reports are available within SchoolsBuddy for many purposes, including take up of activities, attendance at events, and detailed financial reports.

Custom Data
Make SchoolsBuddy work for you. We can include custom data fields for your individual needs; simply discuss your requirements with our team.

We work with you to make the perfect solution for you and your school. Responsive development teams and support around the clock ensure complete satisfaction.

Customisable	Colours, labels and custom data forms make your SchoolsBuddy unique.
Localisation	We offer multiple language options to ensure parents can fully engage with the system.
Integration	Painless integration with most MIS/SIS systems, either directly or via our integration partners. As part of Faria Education Group we offer enhanced integration for ManageBac schools.
Support	Our support teams in the UK and Asia offer fast response times and assistance to our schools.

"We are LOVING SCHOOLSBUDDY. Never have I had a large new system like this roll out so smoothly. Thank you a million times."

Clint Carlson, Istanbul International Community School
