Data Integration

via GG4L

GG4L is our integration partner used to sync the data from your SIS (e.g. PowerSchool)

Your step by step guide to get your SIS school data into SchoolsBuddy

1. Email Introduction

You will receive an email from us, to introduce you to GG4L onboarding team.

2. GG4L Initial Contact

Shortly after this email the GG4L onboarding team will contact you to begin the process of integrating your SIS data into SchoolsBuddy.

3. GG4L Process (inc Field Identification for PowerSchool)

GG4L will work with you and us to ensure your data is correctly synced with SchoolsBuddy. It is very important to inform GG4L carefully of the following field names if you are using PowerSchool as your SIS :-

- Field name of Parent Email
- Field name used for HomeRoom
- Let SchoolsBuddy know if you want to only import/sync particular contact types
- If you want to sync medical data we can do so if you can concatenate your medical data into one field.
